Business Description

This long established company has a fully equipped machine shop doing prototype development of custom machined parts that meet very specific needs for their many customers in industries such as medical, automotive and aerospace. For nearly 30 years their success has been due to high quality work and excellent relationships with their long term customers. The business, building and property on over an acre of land are for sale. The asking price includes business and all equipment for \$200,000 plus \$350,000 for the building and property.

An ideal buyer would have a background in this type of business, or an experienced business owner willing to hire machinists. There is great potential for substantially increasing sales for a new owner doing some marketing and advertising!
